PROFESSIONAL SUMMARY

Senior Full-Stack Developer and E-commerce Integration Engineer with 17 years of commercial web development experience, all of it in e-commerce, starting in 2009.

Extensive experience with Shopify Plus, BigCommerce, CS-Cart, and WooCommerce, focused on platform migrations, API integrations, data synchronization, and e-commerce automation.

Experienced in migrating production stores between e-commerce platforms, including products, variants, customers, historical orders, categories, images, custom data, and SEO redirects.

Designed and developed integration systems using REST APIs, GraphQL, webhooks, and Cloudflare Workers to synchronize product catalogs, pricing, inventory, customers, orders, and other business data across multiple stores and external systems.

Contributed to 100+ commercial e-commerce projects, combining hands-on development with solution architecture, code reviews, task estimation, technical research, developer support, and client communication.

CORE EXPERTISE

E-commerce platforms: Shopify · Shopify Plus · BigCommerce · CS-Cart · WooCommerce · WordPress

Shopify ecosystem: Admin API · Storefront API · GraphQL · Webhooks · Checkout Extensibility · Functions · Flow · B2B · Scripts · Pixels · Customer Accounts · Theme Development · Extensions

Migrations: Shopify · BigCommerce · WooCommerce · CS-Cart · Proprietary platforms · Data, URL mapping and 301 redirects

Integrations and sync: REST API · GraphQL · Webhooks · Catalog, inventory, pricing, customer and order synchronization

Backend: PHP · Laravel · MySQL · SQL

Frontend: JavaScript · TypeScript · Liquid · HTML · CSS/SCSS · Tailwind CSS · Alpine.js · Vite

Cloud and serverless: Cloudflare Workers · KV · D1 · Cron

Third-party services: Recharge · Klaviyo · Yotpo · Klevu · Algolia · Searchanise · Mailchimp · Stripe · ShipStation · UPS · USPS · FedEx

Engineering: Git · GitHub · GitHub Actions · Solution Architecture · Code Review · Task Estimation · Debugging · Performance Optimization · Technical SEO · Developer Support

PROFESSIONAL EXPERIENCE

Founder and Full-Stack Developer — BigMed.ge

February 2026 — Present

Founder and developer of a public multilingual medical platform for finding doctors and clinics.

- Develop the product end to end, from data model to interface.
- Design the frontend architecture and user experience.
- Build the multilingual site architecture.
- Handle technical SEO.
- Implement structured data and Schema.org markup.
- Design the SEO architecture for doctor, clinic, specialty, and location pages.
- Optimize performance.
- Research and implement approaches to AI/LLM discoverability, presenting medical content in a structured form for search engines and AI systems.

Absolute Web — Senior Full-Stack / E-commerce Developer

November 2011 — Present · Remote

Long-term collaboration with an international e-commerce agency, contributing to 100+ commercial projects across Shopify, Shopify Plus, BigCommerce, CS-Cart, WordPress/WooCommerce, and other platforms.

- Develop and maintain complex e-commerce solutions across frontend, backend, and integration layers.
- Plan and execute migrations between Shopify, BigCommerce, WooCommerce, and proprietary e-commerce platforms.
- Design and build REST API, GraphQL, and webhook-based integrations.
- Build automated synchronization solutions for products, pricing, inventory, customers, and orders.
- Develop serverless integration solutions using Cloudflare Workers, KV, D1, and scheduled jobs.
- Work extensively with Shopify Plus, including Checkout Extensibility, Functions, Flow, B2B, Pixels, Customer Accounts, and extensions.
- Build custom Shopify storefronts from Figma designs using modern development workflows including Vite, TypeScript, SCSS/Tailwind CSS, and GitHub Actions.
- Develop custom CS-Cart themes and add-ons.
- Integrate subscription, search, marketing, payment, shipping, and analytics platforms.
- Design technical solutions and research implementation approaches for complex requirements.
- Perform code reviews, technical estimations, and risk assessments.
- Support other developers in solving complex technical issues.
- Communicate directly with project managers and clients on technical requirements and solutions.

SELECTED ENGINEERING PROJECTS

Multi-Store Shopify Synchronization

Designed and developed a centralized integration architecture connecting one master Shopify store with five regional Shopify stores.

Synchronized product data, discounts, orders, customers, and inventory between stores through custom API integrations and Cloudflare Workers.

The solution used REST APIs, GraphQL, Cloudflare KV, D1, and scheduled processing for different parts of the synchronization workflow.

E-commerce Platform Migrations

Planned and implemented full production-store migrations between WooCommerce, BigCommerce, Shopify, and proprietary e-commerce platforms.

Migrated products, variants, customers, historical orders, categories/collections, images, custom fields/metakeys, and other related data.

One migration included approximately 2,000 products and 15,000 historical orders moved from a proprietary cloud e-commerce platform to BigCommerce.

Handled technical SEO during migrations, including URL mapping and 301 redirects when URL structures could not be preserved because of architectural differences between platforms, such as BigCommerce hierarchical categories versus Shopify collections.

Supplier and Dropshipping Synchronization

Developed synchronization pipelines for supplier and dropshipping data across Shopify and WooCommerce stores.

Used both API-based integrations and CSV-based bulk processing, selecting the appropriate approach based on catalog size, synchronization requirements, and platform API limitations.

Chose bulk processing where it cut unnecessary API requests and kept the job clear of rate-limit bottlenecks.

BigCommerce B2B Integrations

Developed and maintained complex BigCommerce B2B solutions involving multiple interconnected systems, including backorder functionality, third-party search, and other e-commerce integrations.

Worked on integration compatibility and custom storefront behavior required to support B2B purchasing workflows.

Web Developer — Lipen Furniture House

September 2009 — April 2011 · Melitopol, Ukraine

E-commerce website for a furniture retailer, built on CS-Cart.

- Built the company's online furniture store from concept through production launch.
- Developed a custom CS-Cart theme tailored to the company's requirements.
- Created custom CS-Cart modules and functionality.
- Implemented technical SEO and optimized the site's structure for search engines.
- Managed and maintained the e-commerce website after launch.
- Worked on storefront usability, performance, and ongoing feature development.

Industrial Automation / PLC Programmer

2007 — 2009 · Melitopol, Ukraine

Worked with the control system of an automated electroplating production line.

- Programmed and configured PLC-based industrial control systems.
- Worked with Siemens and Omron PLCs.
- Modified control logic and automated equipment sequences.
- Configured production-line operating modes and operator workflows.
- Diagnosed and adjusted automated equipment behavior.

EDUCATION

Zaporizhzhia Institute of Economics and Information Technologies · 1999 — 2004

Bachelor's Degree — Computer Systems and Networks

Studies included computer systems and networking, network administration and design, wireless networks, C++, and microcontrollers.

CERTIFICATION

Shopify — Liquid Storefronts for Theme Developers

May 2025 — May 2027

LANGUAGES

Ukrainian: Fluent

Russian: Fluent

English: Intermediate reading and written technical communication; limited spoken communication
